of nature

reflection of nature

Beauty of a stone shaped by the natural forces, is one of the nature's gifts for the humanity. Since the dawn of time, humans used stones for various reasons whether as a tool or as a gift or as an element to build a wall for protection.

Our Stone has been the perfect product that respects nature by means of physical appearance and colors; for more than 20 years. We have been learning from nature's process of self-correcting design process and applying it to our products. All of our stone and brick designs are created to tell a story of the nature: The surface and the shapes may tell you how strong was the stone and the wind or stream that gave the form; the colors may tell you about the sunlight, the rain and the snow. Indoors or outdoors, our products will transform your living areas to creative and elegant forms shaped by your desire.

RHODES BRICK

RUSTIC BRICK

Rustic Brick series, characterized by its bricks having deep textures similar to the ones produced using age-old, handmade brick making tradition of Europe; claims to create surfaces that cannot be distinguished from the ones that are laid using handmade clay bricks.

BACK-UP WALL TYPES AND SURFACE PREPARATION REQUIREMENTS

WOOD

1. Sheathing,
2. Two layers of water resistive barrier (WRB),
3. Galvanized metal lath,
4. Scratch coat,
5. Mortar setting bed,
6. Cultured Stone manufactured stone veneer,
7. Mortar joint.

UNIT MASONRY CONCRETE

1. Mortar applied directly to untreated, unpainted masonry, concrete or stucco,
2. Cultured Stone manufactured stone veneer,
3. Mortar joint. Note: Painted, sealed, dirty & smooth surfaces/walls will require additional preparation to address these conditions.

METAL FRAME

1. Sheathing,
2. Two layers of water resistive barrier (WRB),
3. Galvanized metal lath,
4. Scratch coat,
5. Mortar setting bed
6. Cultured Stone manufactured stone veneer,
7. Mortar joint.

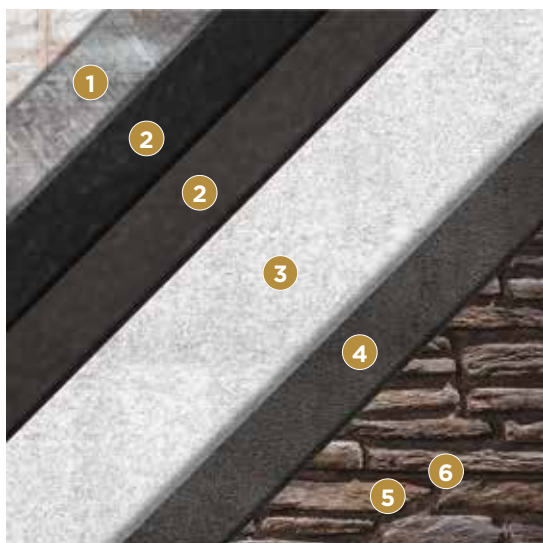

RIGID FOAM INSULATION

1. Rigid foam insulation,
2. Two layers of water resistive barrier (WRB),
3. Galvanized metal lath (Ribbed Lath shown),
4. Scratch coat,
5. Mortar setting bed,
6. Cultured Stone manufactured stone veneer,
7. Mortar joint.

METAL BUILDINGS

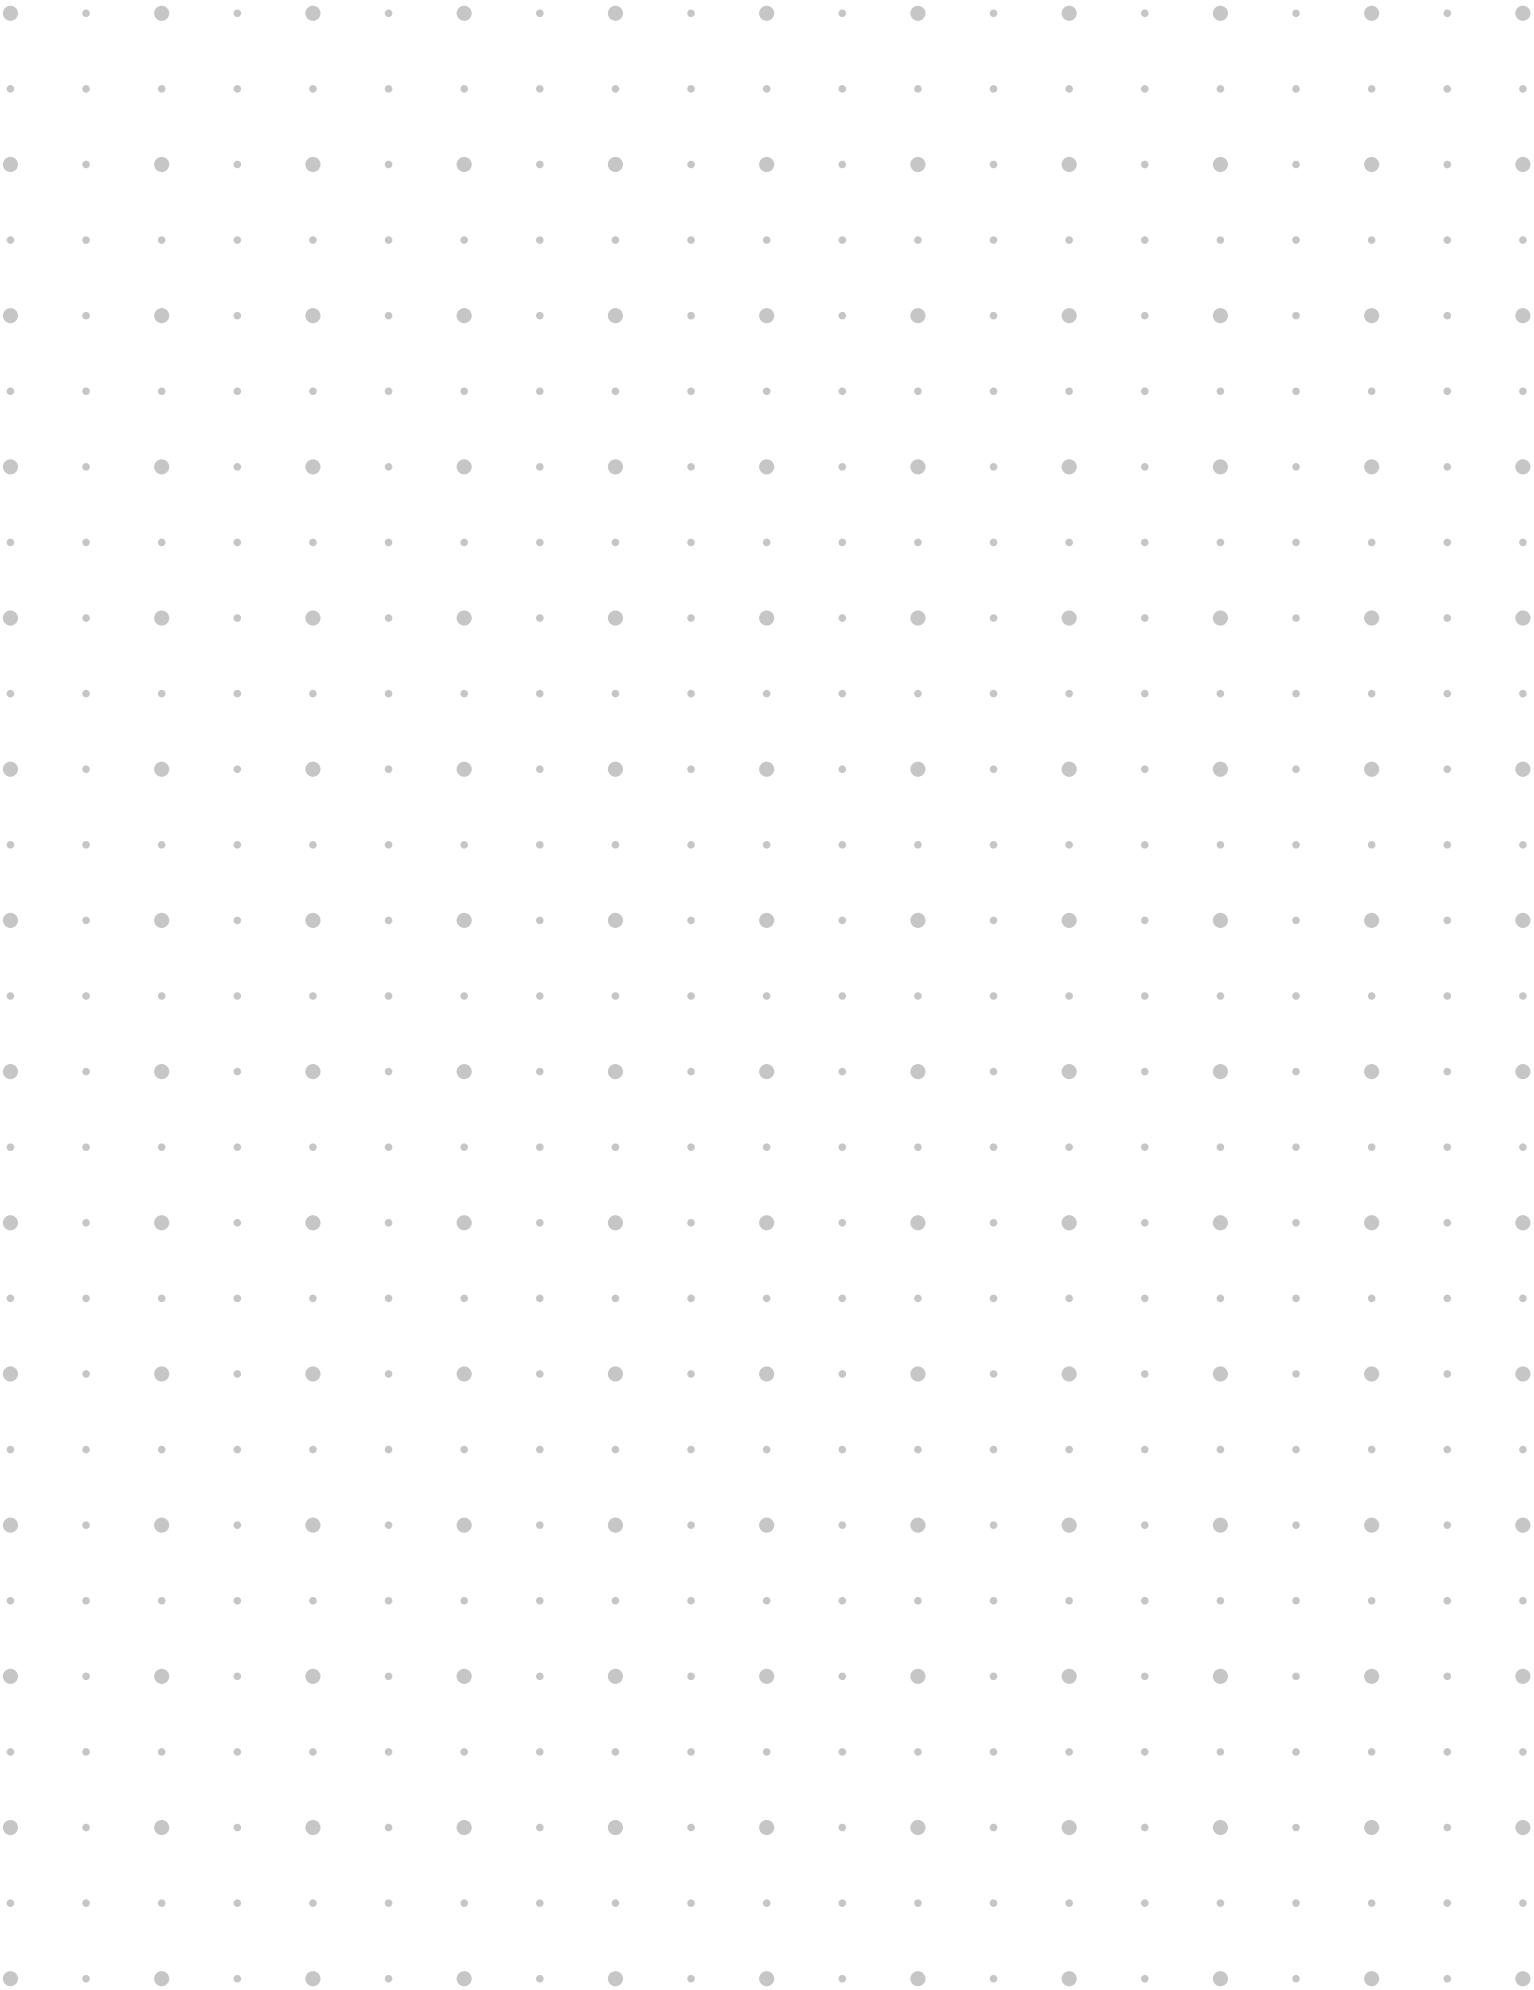

1. Sheathing,
2. Two layers of water resistive barrier (WRB),
3. Galvanized metal lath,
4. Scratch coat,
5. Mortar setting bed,
6. Cultured Stone manufactured stone veneer,
7. Mortar joint.

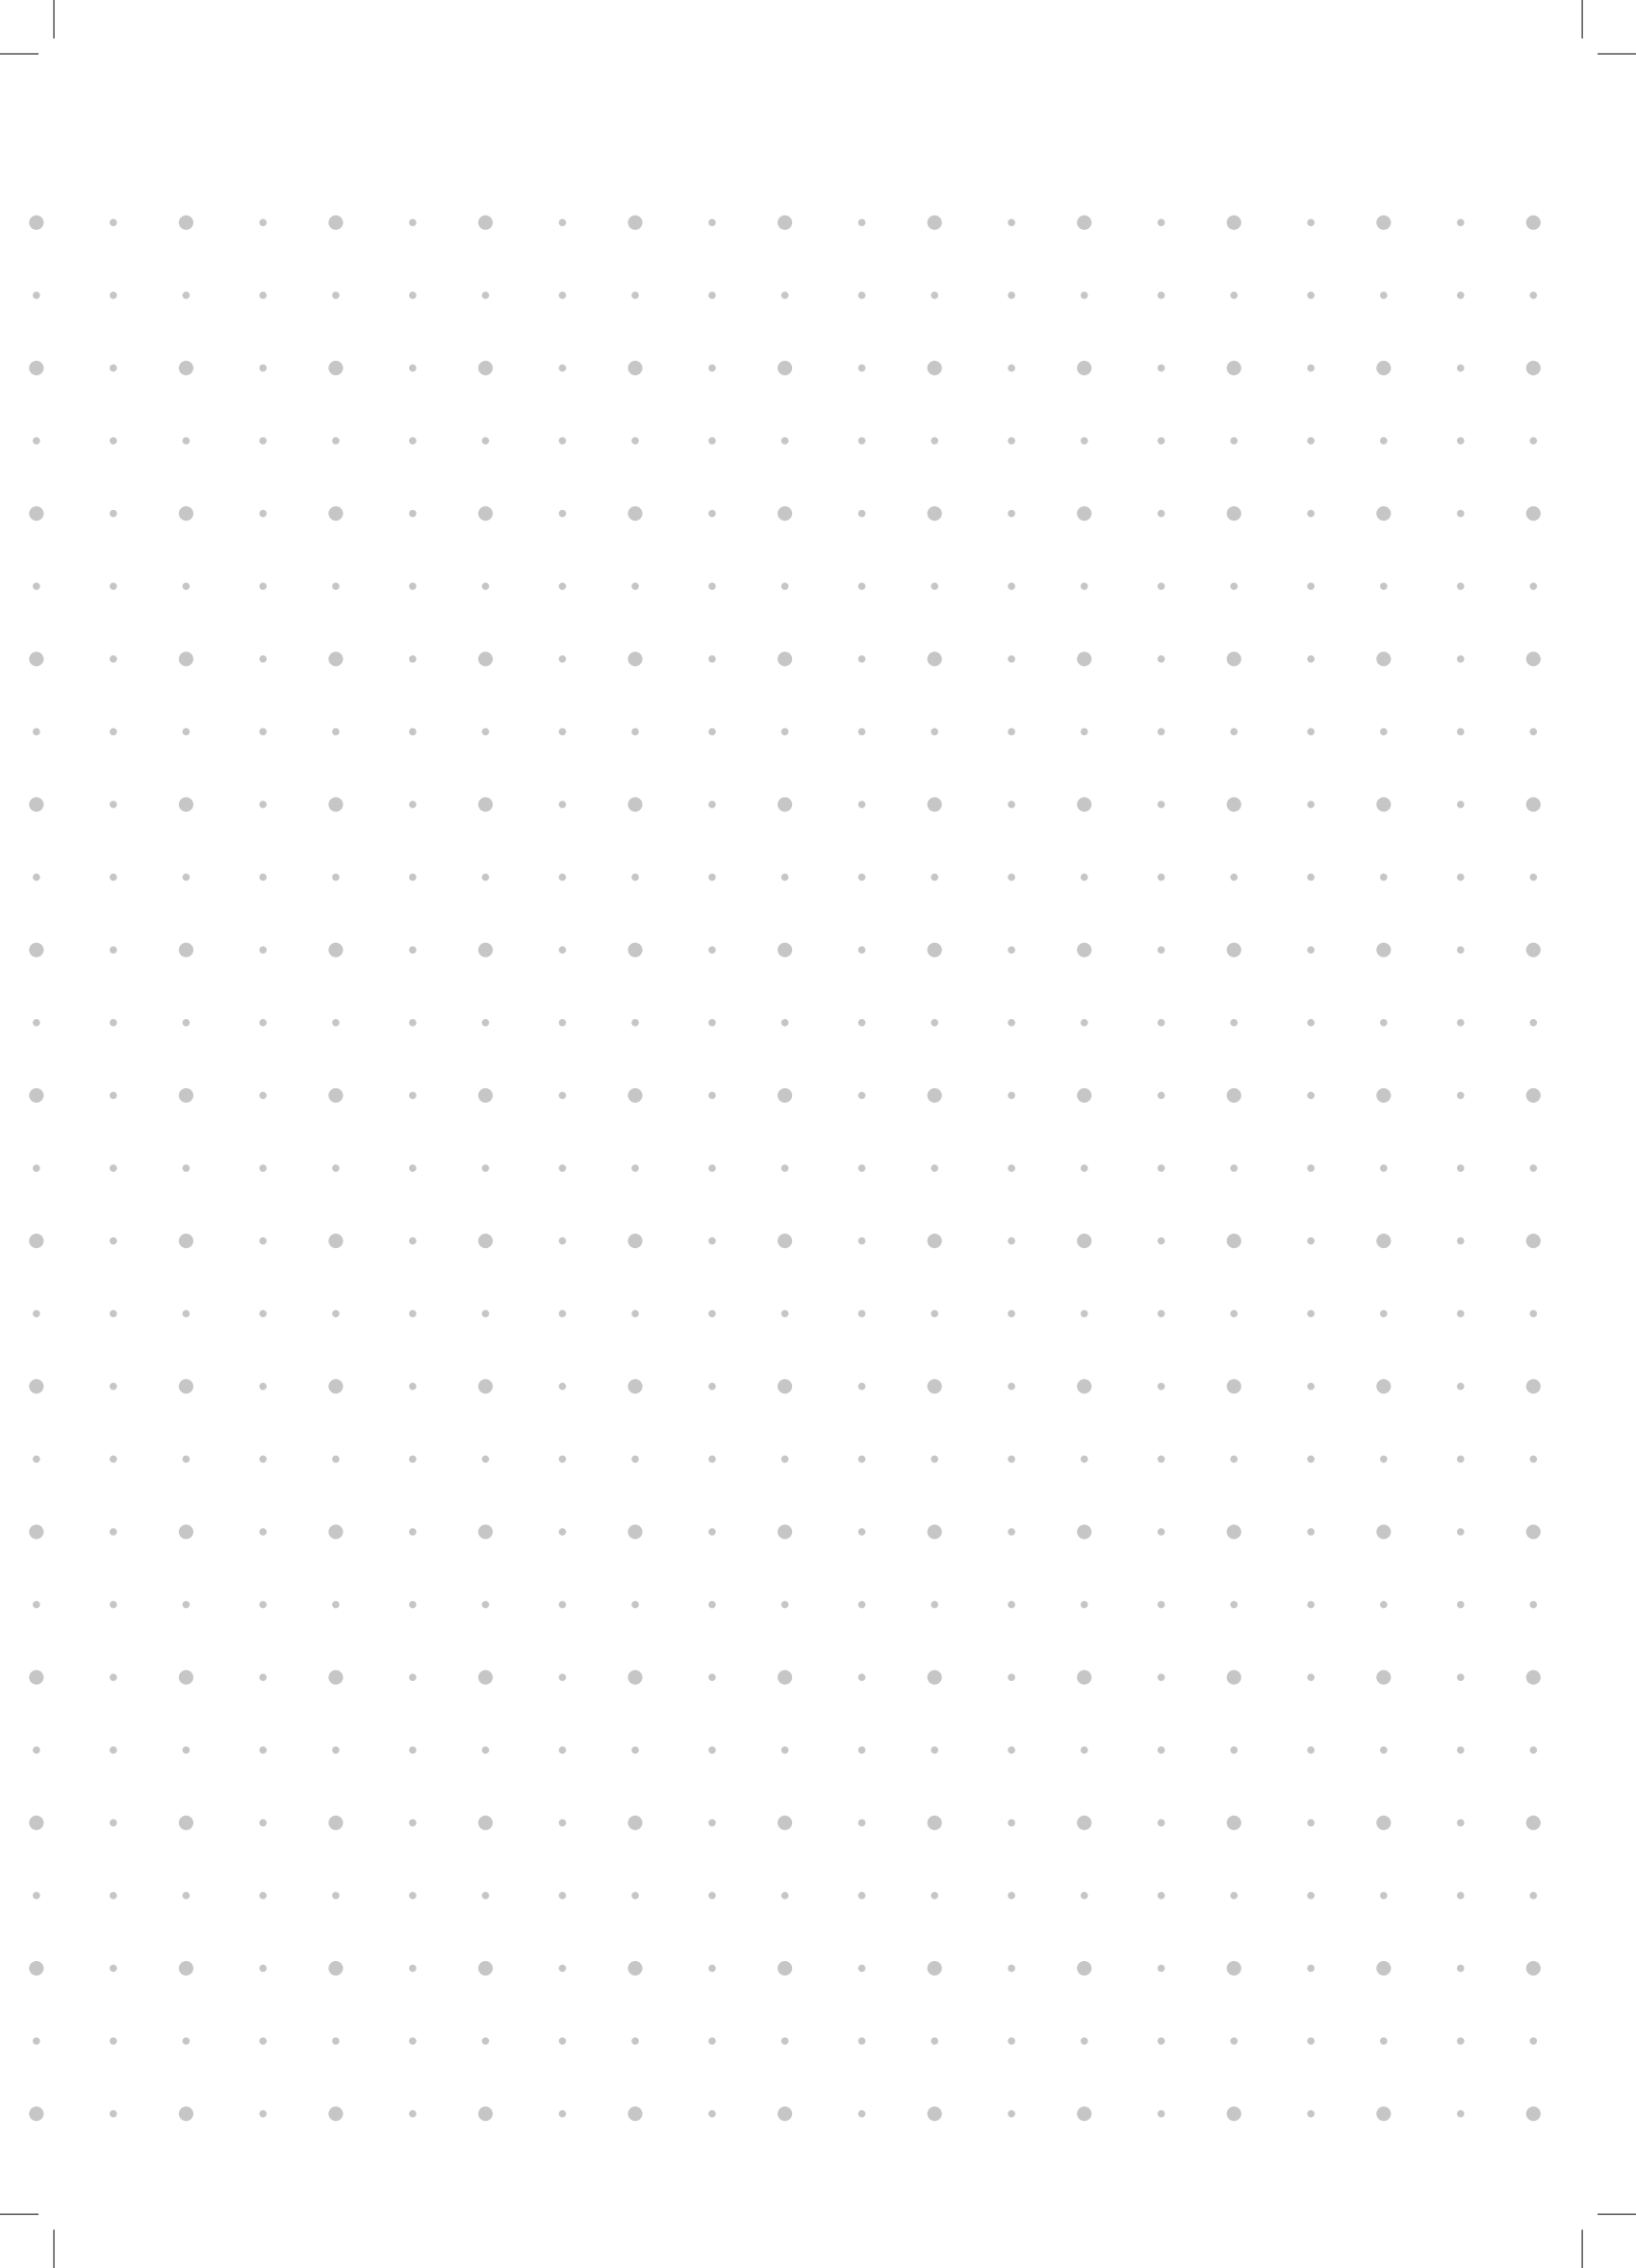

CEMENT BOARD

1. Sheathing,
2. Two layers of water resistive barrier (WRB),
3. Cement board,
4. Mortar setting bed,
5. Cultured Stone manufactured stone veneer,
6. Mortar joint.
